

EFTCO

**European Federation of
Tank Cleaning Organisations**

www.eftco.org

dear EFTCO Member and Partner

In preparation for the implementation of the eECD 2.0 and the possibility of printing the eECD from the ECLIC platform on normal paper, EFTCO announced by memorandum the printed eECD as a valid EFTCO original cleaning document.

We do see this process of a printed digital twin as a temporary solution to assist the implementation to a paperless eECD communication.

All EFTCO related tank cleaning stations have the following possibilities for documentation of the cleaning:

- **PRE-PRINTED PAPER:** Printing document on the existing EFTCO Cleaning Document preprinted paper formular (old version)
- **PAPERLESS:** Using the digital eECD process and the eECD created within ECLIC and whereby all actors have an eECD license.
- **PAPER-DIGITAL:** Printing the eECD from the ECLIC platform on normal paper foreseen with a QR code and compliancy score, in case the customer asks for a printed version with no digital approach.

EFTCO declares the printed eECD by using ECLIC as a valid cleaning document.

No other format for cleaning documents or individual PDF solutions are authorized by EFTCO.

In the event of an unacceptable increase in fraud cases through the use of the printed eECD 2.0, EFTCO will withdraw the declaration.

However, this measure is preceded by the common will to rectify this situation through organizational measures.
